## Search Results

Nothing Found

Your search for the *Phrase* ("lattice polygon model") did not return any results.To search for *terms* separate them with **AND** or **OR**.

Click on the suggested options:

[\("lattice AND polygon AND model"\)](#)[\("lattice OR polygon OR model"\)](#)

To search for names try using only the last or first name.

You may revise it and try your search again below or click advanced search for more options.

  
  
 [\[Advanced Search\]](#) [\[Search Help/Tips\]](#) [Complete Search Help and Tips](#)**The following characters have specialized meaning:**

Special Characters	Description
, () [	These characters end a text token.
= > < !	These characters end a text token because they signify the start of a field operator. (! is special: != ends a token.)
' @ \Q < { [ !	These characters signify the start of a delimited token. These are terminated by the end character associated with the start character.

**1** [A framework for geometric warps and deformations](#) 88%  
 Tim Milliron , Robert J. Jensen , Ronen Barzel , Adam Finkelstein  
**ACM Transactions on Graphics (TOG)** January 2002  
 Volume 21 Issue 1  
 We present a framework for geometric warps and deformations. The framework provides a conceptual and mathematical foundation for analyzing known warps and for developing new warps, and serves as a common base for many warps and deformations. Our framework is composed of two components: a generic modular algorithm for warps and deformations; and a concise, geometrically meaningful formula that describes how warps are evaluated. Together, these two elements comprise a complete framework useful for ...

**2** [Fast volume-preserving free form deformation using multi-level optimization](#) 87%  
 Gentaro Hirota , Renee Maheshwari , Ming C. Lin  
**Proceedings of the fifth ACM symposium on Solid modeling and applications** June 1999

**3** [Using lattice for web-based medical applications](#) 87%  
 Akira Wakita , Takamichi Hayashi , Takashi Kanai , Hiroaki Chiyokura  
**Proceedings of the sixth international conference on 3D Web technology** February 2001

**4** [XVL: a compact and qualified 3D representation with lattice mesh and surface for the Internet](#) 87%  
 Akira Wakita , Makoto Yajima , Tsuyoshi Harada , Hiroshi Toriya , Hiroaki Chiyokura  
**Proceedings of the fifth symposium on Virtual reality modeling language (Web3D-VRML)** February 2000  
 Computer graphics systems and CAD/CAM systems are widely used and an abundance of 3D-Data in various fields exists. However, based on the VRML technique, it is difficult to send
